SINO-PIPELINE International

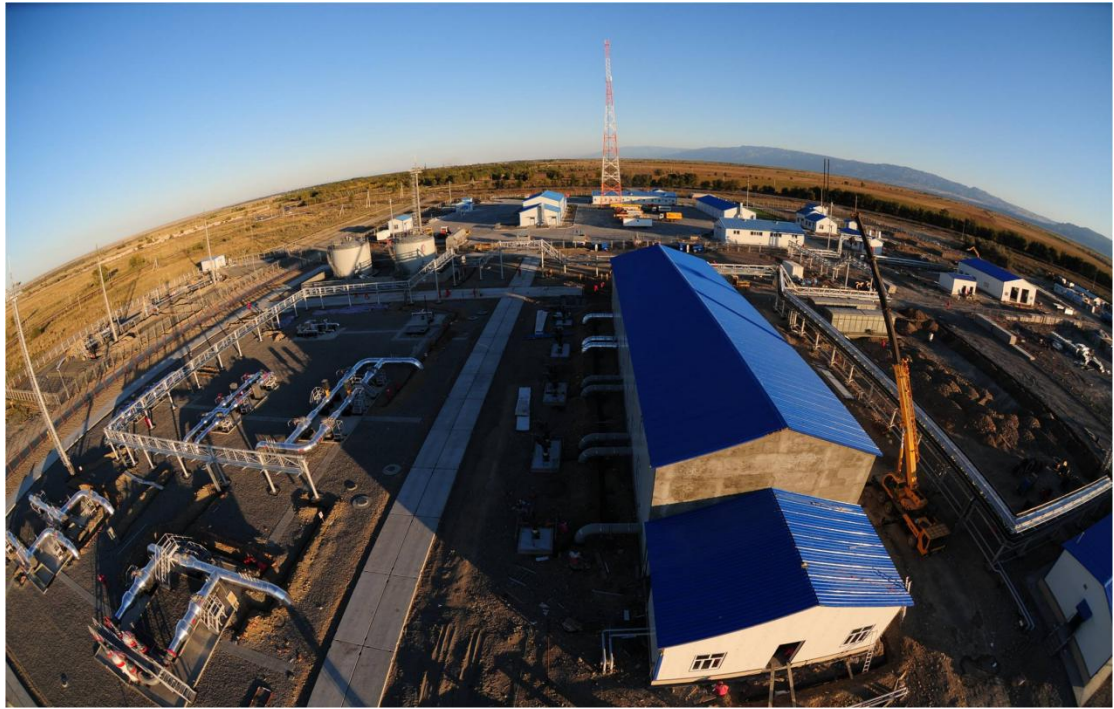

SINO-PIPELINE International (SPI) is a CNPC company specializing in overseas oil & gas pipeline operation. It runs 11 subsidiaries, business of which covers six countries including Uzbekistan, Kazakhstan, Tajikistan, Kyrgyzstan, Myanmar and China. SPI is currently managing 6 natural gas pipelines, 3 crude oil pipelines and 1 crude oil port in Made Island, which is capable of receiving VLCCs up to 300,000 DWT. All the pipelines add up to over 11,000 kilometers in length, with an annual oil & gas transmission capacity of 105 MTOE. SPI has built two major strategic energy corridors on the Northwest and Southwest of China. It is playing a pivotal role in securing China's energy supply, optimizing national energy consumption structure, as well as echoing the nation's call on Building a Beautiful China. As a pioneer and loyal practitioner of the "Belt and Road" Initiative, SPI, by its unrelenting efforts, is continuously contributing to the deepening of China's cooperation with Central Asian and Southeast Asian nations in the energy sector.
